

Ki Little Wave Arc

Stylish and modern, it is a fully configurable wheelchair able to provide comfortable and supportive seating that grows with your child.

Ahead of the curve

The lightest paediatric folding pivot tilt with center of gravity translation!

Ready set grow!

Unlike shoes, you can't just go out and get another pair when your child outgrows their chair. So, we built in plenty of growth and offer unique programs for growing kids. We also designed the Arc with the latest high-strength, lightweight materials to make it durable.

Arc tilt system

Keeping parents in mind, the Little Wave Arc is your best solution for kids who need tilt-in-space. Our Arc Tilt System (patent-pending) results in effortless repositioning and a shorter, more maneuverable, wheelbase.

Get out & Go!

Arc is the lightest pediatric folding tilt-in-space wheelchair available. It's intuitive, easy-to-fold design and compact wheelbase make its folded footprint very small. It's the perfect fit, leaving plenty of room for a family on the go.

Colour your Arc

Build your Wave

We custom build your Little Wave Arc to your exact needs and requirements. With our huge range of seating options we have what you need. Whether its basic seating with low support, or a complex seating system with custom build parts and high support, we have you covered.
