playpak

## Playpak is a portable activity kit for babies and young kids with special needs.

Playpak is a portable activity kit for babies and young kids with special needs. This lightweight bag contains an entire activity centre. Inside you will find rolls, wedges and supports that stick together in dozens of ways and let your child practice different developmental postures which form the building blocks for later abilities.

### PLAYPAK HELPS BABIES AND YOUNG CHILDREN DEVELOP THROUGH PLAY.

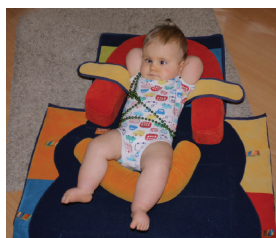

Playpak lets you play a bigger part in your child's therapy, and that matters a lot. Research shows that early intervention programmes for babies and children that allow therapists and parents to work together, like Playpak does, make a bigger impact on a child's development. This lightweight bag contains an entire activity centre. Inside you will find rolls, wedges and supports that stick together in dozens of ways and let your child practice different developmental postures which form the building blocks for later abilities. Playpak also comes with a handy therapy guide, featuring advice and easy-to-use instructions that show you how to use each clever little piece to create different sitting and lying positions, as well as how to perform all the recommended developmental games with your child.

### PRACTICAL

Your Playpak is light, handy and can go anywhere. Grab it when you head to gran's house and your little one can happily play, learn and get stronger while the grown-ups catch-up. Take it to a birthday party so junior gets great therapy and misses none of the action. Or hang it on the stroller and head to the park for impromptu therapy with a picnic. You'll want to take it everywhere – and you can. You'll find it easy to store at home too. Just hang it on a coat hook, in a corner or in the wardrobe – it's durable enough to take a little bit of squishing, squashing and bashing.

## MULTIPLE POSITIONS

The various supports allow you to achieve an even wider variety of developmental postures and positions, such as; tummy lying, floor sitting, back lying and 4-point kneeling.

**KNEELING**

## THERAPY KIT IN ONE

Your Playpak is light, handy and can go anywhere. Grab it when you head to visit a friend or family member, or take it to a birthday party so your little one doesn't miss out on the action. You'll want to take it everywhere – and you can. You already know how important therapy is in your child's early years, but sometimes finding the time can be a challenge. Playpak gives you the chance to make every day count. Every spare moment becomes a chance for great fun and therapy.

### FABRIC FLOOR MAT

The colourful floor mat has 'fluffy' velcro lining, to which all components can be easily and securely attached/removed.

### ROLLS

These rolls can be used on their own or with other support elements to provide just the right level of support for your choice of activity.

### HORSESHOE

These profiled cushions are designed to give your child lower and upper back support, while allowing hands to be free for play.

### STRAP AND HEADREST

Use this versatile strap in addition to the rolls for extra support when needed at the front, sides or back.

## ADVANCED SUPPORT

Using additional components with the Playpak allows you to achieve an even wider variety of developmental postures and positions. Using an additional horseshoe component for example can help to facilitate a larger or stronger child, whilst additional short and long rolls can further support side lying and four point kneeling.

The Playpak Therapy Programme guides readers through a series of Mobility, Ability and Participation goals and activities, explaining how each one can be used to develop the earliest of skills, from lying to crawling.
