

# Quantum Stretto

Tight corners and small spaces – no problem!

The Quantum Edge 3 Stretto is the narrowest power base on the market and a great choice for children, teenagers and smaller adults who are looking for reliability and maneuverability.

## iLevel empowers

- ✓ Reaching
- ✓ Cooking
- ✓ Working
- ✓ Self care
- ✓ socialising
- ✓ And so much more...

Colour your Stretto

A true pediatric wheelchair. Although existing Quantum bases can accommodate pediatric seating, the narrow width of the Stretto® offers easy maneuvering that children and teenagers love. This kids wheelchair comes standard with a USB charger port and front and rear LED fender lights, so children can see and be seen. The Stretto® is available with 12.5" or 14" drive wheels and optional 12" of iLevel® power adjustable seat height.

In addition to its narrow width, the Edge 3 Stretto® is equipped with independent SRS (Smooth Ride Suspension), which offers increased shock absorption due to the angle of the shocks. Enjoy maximum obstacle climbing and increased overall comfort. With so many great features and benefits, the Stretto® is truly a milestone for pediatric power and the perfect child wheelchair choice!

## What is iLevel?

The world is not designed around seated height, and unfortunately wheelchair users for too long have been excluded from many everyday functional tasks and interactions beyond their physical reach. iLevel is a feature that can dramatically increase the quality of life for power chair users. From in the home to out in the community, a power elevating seat can help make life safer for users, make social interactions more fulfilling, and give people who use motorized wheelchairs access to common areas of their home.

iLevel feature is a revolutionary new power chair design for a better experience. iLevel from Quantum® improves daily functionality and quality of life by allowing operation of the power chair with the seat fully elevated while at speeds at 4.5 mph.
