

# Bingo Mini Stroller

## A FEELING OF SECURITY FROM THE START

The Bingo mini is a smaller version of the Bingo Evo stroller, so it is better suited to smaller children. It gives families a non-medical looking stroller that will give their child the postural support they need. The Bingo transforms the lives of special needs families!

### SUSPENSION

Fourfold adjustable frame suspension system which can be easily adjusted without tools. The innovative suspension system absorbs bumps from the ground, allowing the frame to be flexible in all directions, even diagonally which is especially effective off road or on rough terrain. The mode of operation allows a power-saving bending on the rear wheels, e.g. to get over kerbs.

### RECLINE

The Bingo Evo features an easy to use back support recline, letting your child rest back or sit upright! This is operated by a simple turn knob on the rear of the back rest that is positioned centrally and is easy to reach, allowing easy and secure handling.

### TILT IN SPACE

The special construction of the tilt mechanism allows a 45° tilt of the seat unit in and in a reverse riding position without compromising the overall stability. This is operated by a simple lever on the rear of the back rest that is positioned centrally and is easy to reach, allowing easy and secure handling.

### MUSICAL HEADRESTS

Perfect addition to the Bingo Evo for the ultimate sensory experience! Lull your child to sleep with a quiet tune! Speakers built into the headrest can be just what you need to keep your child calm while out and about.

### COMPACT

Easier to store in a car boot! The innovative folding mechanism can be released easily on the push bar.

### COLOUR YOUR BINGO

The Bingo Mini comes in three different colours. So clients have the opportunity to choose a colour that best suits their personality.

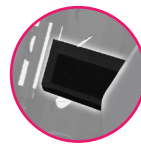

## ACCESSORIES

We customise the Bingo mini stroller to best suit your child's needs. The Bingo has many options and accessories, so it can be adapted to support where it is most needed.

lateral support

seating  
contouring

pommel

harness

activity tray

therapy tray

oxygen holder

IV pole

sun canopy

headrests

footrests

## COBRA INDOOR ACTIVITY BASE...

The Bingo has you covered, not only for a stroller, but for an indoor seat as well. It easily attaches to our cobra indoor base. Offering 45 degrees of tilt and a continuous adjustable gas spring for height adjustment, this is an easy to use system. Tilt and height adjustment of the seat can be applied with the child sitting in the seat to allow for perfect adjustment.

## ONE CHAIR MAY USES

Many special needs children need multiple pieces of equipment to live life. The Bingo makes life that bit more easier as you have a 2 in 1 arrangement with the stroller and cobra base. The one seat, with many uses. It also prevents your child having to adjust to many different pieces of equipment, having one chair that covers everything. It can be used in the classroom, at home while relaxing by the TV, at the dinner table with the family, and then attach it to the stroller to go out to the shops, or for a walk in the park.
