

Eurocare Viscount

Based on principles of comfort and safety, the Eurocare range is the optimal solution for a home care bed to be used in the home environment. All bed functions are electronically controlled for increased ergonomic relief for the staff and the highest possible comfort level for the patients. The Eurocare Viscount Home Care Bed has converted the home care bedding sector into a stylish modern piece of furniture whilst maintaining the highest level of safety, stability, usability and longevity.

Product Features

- All bed functions are electronically controlled
- High comfort level for patient
- **Wooden Rails** – 380mm high rails to reduce the risk of patient injury
- **Hand Control** – A user friendly design that allows the system to be locked to prevent unauthorised movements of the bed, caring for the patient's safety
- **Use of Rails** – User friendly release system to lower wooden side rail
- **Cable System** – Well organised cable system to reduce the risk of cables getting trapped/tangled under the bed
