# Yomper+ Power Assist

## A Little Extra Power, A Lot More Freedom

## DISCOVER THE DIFFERENCE

**Discover how the Yomper+ is changing the way manual wheelchair users experience everyday mobility, combining the freedom of a manual wheelchair with the convenience of powered assistance.**

For many manual wheelchair users, independence means having the freedom to go further, explore more & participate in everyday activities without the physical demands of constant propulsion. Whether navigating shopping centres, enjoying the outdoors, travelling longer distances or tackling challenging terrain, having a little extra assistance can make a significant difference.

## THAT'S WHERE THE YOMPER+ POWER ASSIST COMES IN...

Designed to complement your existing manual wheelchair, the Yomper+ is a compact, lightweight and innovative power assist system that provide motorised propulsion while allowing users to maintain the familiar steering and handling of their manual chair.

## KEEP YOUR WHEELCHAIR. ADD THE POWER

One of the standout features of the Yomper+ is its clever, discreet design. Weighing just 5.8 kg, this compact power add-on attaches beneath the wheelchair, in line with the rear axle, helping preserve the chair's natural handling & maneuvrability.

Compatible with most rigid and folding manual wheelchairs, the Yomper+ offers an alternative to transitioning to a fully powered wheelchair. Its innovative mounting system even allows compatible folding wheelchairs to retain their folding functionality.

With small castor wheels and a convenient handle, the unit can be positioned and connected without needing to lift it into place, making attachment and removal practical for everyday use.

- *Easy Control – Adjustable speeds & wireless operation.*
- *Less Effort – Reduce fatigue and strain.*
- *Lightweight & Compact – Just 5.8 kg.*
- *Go Further – Up to 35 km range.*

## LESS EFFORT. MORE POSSIBILITIES

Imagine enjoying a day out without worrying as much about the physical effort required to get from one destination to another.
The Yomper+ features a powerful 250W motor, delivering speeds of up to 10 km/h and a travel range of approximately 23 km with the standard battery, or up to 35 km with the extended range option. By reducing the effort required for propulsion, particularly over longer distances, slopes, grass and gravel, the Yomper+ can help minimise fatigue and reduce repetitive strain on the arms and shoulders. It's about conserving energy for the activities that matter, rather than using it all just getting there.

## INTELLIGENT CONTROL, TAILORED TO YOU

Every wheelchair user has different strengths, abilities and mobility goals. The Yomper+ recognises this through its intuitive EasyGo wireless controller.
Featuring dedicated indoor and outdoor modes, each with five adjustable speed settings, the system can be configured to suit individual preferences and different environments.
The motor provides forward propulsion while the user continues to steer using their wheelchair's handrims, maintaining a familiar sense of control. An optional attendant control also provides powered assistance for a support person when required.

## DESIGNED FOR EVERYDAY LIFE AND BEYOND

From local outings and community participation to holidays and travel, the Yomper+ brings added flexibility to manual wheelchair mobility.
Its lightweight construction, removable design and included travel case make transportation and storage convenient. The battery options are designed to meet applicable air transport requirements, although airline approval should always be confirmed before travelling.
Small in size, but big on possibilities, the Yomper+ demonstrates how innovative assistive technology can help support greater independence & participation in everyday life.

## EXPERIENCE THE YOMPER+ WITH ACTIVE REHAB

At Active Rehab, we understand that choosing the right power assist technology is about more than product specifications. It's about finding a solution that complements the individual's wheelchair, physical abilities, lifestyle and mobility goals.
Working collaboratively with wheelchair users, therapists & families, our experienced team can assist with product selection, compatibility assessments and individualised trials to help determine whether the Yomper+ is the right fit.

**Discover how a little extra power can help you LIVE LIFE to the fullest.**
